

haid-tec **MelaminePlusPad**®

Optimal results, less effort!

MelaminPlusPads were specially developed for cleaning mineral floor coverings, porcelain stoneware tiles, natural stone, concrete stone and structured surfaces.

composition

The haid-tec MelaminPlusPads are made of a special material composition and therefore enable excellent mechanical cleaning performance. After several years of research, it has been possible to refine and press high-quality melamine resin foam and selected additives using special adhesives in such a way that an extremely high tear resistance and service life is achieved. This opens up completely new application possibilities.

Benefits and performance

- Excellent mechanical cleaning results
- Use: basic cleaning, maintenance cleaning and special cleaning
- Floor covering can be preserved largely in new condition
- Long service life of approx. 10,000 sqm per pad
- Floor coverings are cleaned with little effort and time
- Can be used with all common cleaning agents

EFFECTIVE ON NUMEROUS FLOORING TYPES

Excellent cleaning results on mineral and elastic floor coverings.

IMMEDIATE COST SAVINGS

Convincing service life. The use of chemicals can be reduced in most cases. Basic cleaning can be avoided.

ENVIRONMENTALLY FRIENDLY

Reuse / recycling of German melamine resin foam. Reduction of aggressive chemicals.

SPECIFIC

The right pad for every machine with recess if necessary and adapted back material
