

# Instructions

## Application haid-tec PinkPowerSaverPad

### The following must be noted by using the PinkPowerSaverPads:

- Do not use haid-tec PinkPowerSaverPads dry!
- The gray-white side of the pads faces towards the flooring.
- In contrast to conventional melamine pads, it is also suitable for scrubber dryers with weak motors and low battery capacity
- DO NOT use on sensitive surfaces (e.g. high-gloss plastics, painted surfaces, etc.).
- If necessary, test in an inconspicuous area before use (observe the floor manufacturer's instructions).

Mount the haid-tec PinkPowerSaver on suitable drive plates of the scrubber dryer:

- The use of an inner hole mount is recommended
- Use with all common driving plates (hedgehogs, hooks, bristles, etc.)
- Moisten PinkPowerSaver pads before use or increase the amount of water at the beginning.

**Due to the excellent mechanical cleaning properties, the amount of cleaning agents used can be reduced if necessary.**

**The pads can be used with all common cleaning agents.**

**Follow the manufacturer's instructions for use and dosage.**

The pads wear out when cleaning. If the gray and white melamine foam is worn away and the pink scouring pad is visible, the pads need to be replaced.

In contrast to conventional melamine pads, the haid-tec PinkPowerSaver pads have a significantly longer service life, which depends on the surface quality of the floor covering, the quality of the installation and the type of cleaning machine used.
