

haid-tec Pads for TASKI swingo 250 µmicro

inside hole for good water flow

easy to mount on a driving disc

firm fleece back

- 1 MelaminPlusPads on TASKI swingo 250 µmicro
- 3 Specific recess – full pad use

- 2 PolyPlusPads on TASKI swingo 250 µmicro
- 4 PolyPlusPads with high-quality outer band

haid-tec Pads for TASKI swingo 250 µicro

For the TASKI swingo 250 µicro, we have two specially made pad types in our range that further improve the cleaning performance of your TASKI swingo 250 µicro: MelaminPlusPads and PolyPlusPads. Both types of pad have a robust fleece backing that ensures a firm grip on the TASKI swingo 250 µicro driving discs. It protects the driving discs and the floor covering in case you forget to change used pads in time.

EFFECTIVE ON NUMEROUS TYPES OF FLOORING

Excellent cleaning results on mineral and resilient floor coverings.

IMMEDIATE COST SAVINGS

Impressive service life.
Chemical use can be reduced in most cases.
Basic cleaning can be avoided.

ENVIRONMENTALLY FRIENDLY

Reuse/recycling of German melamine resin foam. Reduction of aggressive chemicals.

Our MelaminPlusPads are made of melamine resin foam that delivers an excellent mechanical cleaning performance. Compression gives our MelaminPlusPads a service life many times longer than pure white or grey pads made of melamine resin foam. The MelaminPlusPads achieve excellent cleaning results especially on porcelain stoneware, vinyl/PVC and other water-resistant floor coverings.

Our PolyPlusPads are made of polyester active fibres that are much finer than the fibres of conventional scrubbing pads or the bristles of brushes. The fine fibres reach much deeper into the microscopic recesses of the surface so that they can remove dirt effectively. They are especially suitable for very textured floor coverings. As PolyPlusPads have significantly less friction than MelaminPlusPads, they can guarantee a long battery life.
