

haid-tec **PinkPowerSaver**

Brings power to the machine

For machines with large drive plates, we have developed the PinkPowerSaver Pads. These pads extend the running time of the cleaning machine by creating less friction on the floor thanks to a unique material mix, while delivering great cleaning results.

Composition

The haid-tec PinkPowerSaver pads consist of a new combination of German melamine resin foam and polyester scouring fleece. This unique mixture ensures improved water flow, less friction and therefore energy savings while at the same time providing very high cleaning performance

Benefits and performance

The pad extends the battery life of your cleaning machine. The motor is put under less strain. Even a machine with a small battery can be used to clean a large object without recharging. Other advantages:

Excellent mechanical cleaning results

- long service life of approx. 20,000 sqm per pad
- Floor covering can be preserved largely in new condition
- Can be used with all common cleaning agents
- Floor coverings are cleaned with little effort and time
- Use: basic cleaning, maintenance cleaning, special cleaning
- Floor coverings: Porcelain stoneware, tiles, concrete stone, PVC / vinyl, linoleum, rubber, epoxy floors

SAVES ENERGY

Less friction with very high cleaning performance.

IMPROVED WATER FLOW

New combination of melamine resin foam and polyester scouring fleece ensures longer service life and removal of coarse dirt.

LONGER SERVICE LIFE

Compared to pure mono-melamine pads, the service life is approximately 30 times longer.

HIGH QUALITY RECYCLED PRODUCT

Made from recycled melamine resin foam, saves water and cleaning chemicals.

ECONOMICAL WORK

Less personnel and chemical use required
