

haid-tec **TurfPlusPad**

For structured outdoor floors

The haid-tec TurfPlusPad has been specially developed for cleaning deep joints and uneven floor structures.

Composition

The haid-tec TurfPlusPad is an active fiber pad made of artificial turf material with a robust backing made of high-strength Velcro. The high-quality stitching ensures an extremely long service life. The high-strength Velcro backing allows the pad to adhere very well to orbital eccentric machines and transmits the vibrations optimally.

Application

Specially designed for use on orbital/eccentric machines for cleaning rough and heavily structured surfaces outdoors and for cleaning patios.

Areas of application

Excellent cleaning results on rough and heavily structured surfaces and uneven floors, such as grouted tiled floors, terrazzo, exposed aggregate concrete floors. Can be used with water and all common cleaning agents. The haid-tec TurfPlusPad is chemical-resistant and can be used with cleaning agents with a pH value of 1-14.

CLEAN

Very good cleaning performance in combination with orbital/eccentric machine.

DURABLE

The robust structure of the artificial turf material and high-quality stitching ensure extremely high tear resistance and a very long service life.

CLEANS DEEP JOINTS

Cleans deep joints and uneven floor structures such as grouted tile floors, terrazzo, and concrete floors.

PAD INSTEAD OF BRUSH

Achieves significantly better cleaning results than the brush on orbital/eccentric machines.

CHEMICAL RESISTANT

Can be used with cleaning products with a pH value of 1-14.
